EDUCATION

PSG College of Technology 2027
M.Sc. Software Systems 7.82
Relevant Coursework: Data Structures & Algorithms,
DBMS, Operating Systems

Shri Vidhya Bharathi Matric. Hr. Sec. School 2022
XII – State Board 91.85%

SKV Matric. Hr. Sec. School 2020
X – State Board 86.63%

PROJECTS

AGENTIXAI

github.com/harshanj07

- Developed a serverless **AI-powered web platform** that generates, installs dependencies for, and previews complete applications from a **single prompt**.
- Built using Next.js, Prisma, Supabase, Clerk Auth, and Gemini **LLM streaming**; deployed on Vercel's serverless platform.

AI-FINANCE-APP

github.com/harshanj07

- An AI-driven personal finance manager built with **Next.js**, **PostgreSQL** and Tailwind CSS that helps users track expenses and make smart financial decisions.
- Powered by Gemini API, it delivers **AI-driven insights** to improve spending habits.

SMARTSCHOLAR

github.com/harshanj07

- A microservice-based research paper recommender using **BERT embeddings** and **TF-IDF** for hybrid similarity matching.
- Built with a React/TypeScript frontend, FastAPI and Node.js backend, and scalable **containerized deployment** using Docker, Kubernetes, and PostgreSQL.

TRIPFUSION

github.com/harshanj07

- An AI-powered travel planner using **FastAPI**, React, and **Gemini** for collaborative itinerary generation, real-time trip management, and expense tracking.
- Features secure **Clerk authentication**, PostgreSQL integration, and optimized group expense settlement logic.

ACHIEVEMENTS

- Coordinator – **Hall & Media** for departmental events, managing logistics and promotions effectively.
- Led the cultural team "**Just Different**" and represented the school handball team as captain.

SUMMARY

Detail-oriented Software Systems student with strong full-stack development, UI/UX, and automation testing expertise. Proficient in React, Node.js, Python, and cloud-native deployment (Vercel, Supabase, Docker, Kubernetes), with hands-on industry experience building and validating safety-critical and production systems. Adept at rapidly learning new tools and frameworks.

SKILLS

■ Programming Languages

C++, Python, Java, JavaScript, TypeScript, C, SQL, PHP, R, Bash

■ Frameworks & Tools

React, Node.js, Django, Express.js, Flask, Streamlit, Git, MATLAB, VS Code

■ UI/UX & Design

Figma, Wireframing, Responsive Design, Tailwind CSS

■ Databases

MySQL, MongoDB, NeonDB, Supabase

■ Cloud & Deployment

Vercel, Supabase (serverless), Docker, Kubernetes

■ Platforms

Windows, Linux

CORE STRENGTHS

Full-Stack Web Development | DSA & OOP Concepts | UI/UX Design | Automation & Testing | Cloud-Native Deployment | Agile Methodologies | Adaptability to Emerging Technologies

WORK EXPERIENCE

FULL-STACK WEB DEVELOPER INTERN

Nithra Apps

Tiruchengode, Tamil Nadu

May – Jun 2026

Nithra Ride App

Engineered scalable Node.js backend APIs for ride booking, driver management, and real-time tracking, handling 100+ daily requests. Integrated secure payment processing, OCR-based driver licence extraction, trip monitoring dashboards, automated reporting, and WhatsApp notifications to streamline operations and reduce manual effort by 60%.

EMBEDDED ENGINEER INTERN

ICU Medical India LLP

Chennai, Tamil Nadu

May – Nov 2025

Project Silver

Automated 300+ validation test cases for ICU Solo and Duo infusion systems using Python, Pytest, and Ubuntu Linux, reducing manual testing effort by 40%. Maintained 200+ automation scripts and streamlined validation, defect tracking, and CI workflows using Jenkins, Jira, and Perforce, contributing to the successful release of 3+ safety-critical medical device software versions.
